

I want to be school councillor, because I am a helpful child and I am always desperate to help. I am always sensible and have not lost any Golden Time since I came to this school, three years ago. I think I am the right person, because I want to include everyone in the activity. The thing that I like the most about our school is that we have so many resources and supplies - unlike my old school, where we had to bring our own ones. Another thing that I like is that we have after school clubs, which we didn't have in Poland. The thing that I would like to improve is to have more time to read, because if we can read it will really help us in the future and we will get to know more, get better jobs and earn more money to support ourselves and our families.

***Olga Zajaczkowska, Class 10***

Dear fellow classmates, I would like to volunteer for school council, because I think there are lots of things I can change. I think I am the right person for the job, because I could improve the length of break time and lunchtime. I also think that some teachers need to be more strict on people who don't work hard, and that everyone in the juniors should be writing in pen. I hope that every lesson is full of hard-working children, and I want everyone to leave school excited and happy. Please vote for me!
